

Prof. Fecker und Partner GmbH

This figure consists of three horizontal panels. The left panel shows a histological image of tissue with a distinct striated pattern. The middle panel is a schematic diagram of a muscle fiber, featuring a grid of parallel lines. Some of these lines are colored green, while others are magenta, representing different components of the myofibrils. The right panel contains a numerical scale with the values 0.0, 5.0, and several empty vertical tick marks.
